

Welcome to BlackJack ! Please read the game rules carefully and enjoy your play!

BlackJack, also known as 21, is a very popular card game which the player plays against a bot dealer.

Game Objective: Players are trying to get a higher card value than the dealer and without exceeding 21. When you win with a card value of 21, you get blackjack !

Card Values: "Ace" could either be 1 or 10; face cards are 10; and the rest of cards are same as the number on the card. Jokers are not involved in this game.

Card Deck: Both players will receive cards from a shuffled deck with a total of 104 cards (two sets).

Game Procedure

Click the application icon to launch the game. Press "Easy" or "Hard" button to choose the difficulty of the game. Then press "Deal" button to start the game. You and the dealer each receives two cards at the start of the game. You will be able to view your cards as well as the dealer's first card. You, then, could choose to press "stand" button(stop getting cards) or press "hit" button to get one more card. The game ends until you press "stand". Then the system your card value with that of the dealer's. If your card value is higher than that of the dealer and it does not exceed not 21. You win. Otherwise, you lose. The text box displays the total number of wins and losses. You are able to choose the difficult before each game.
